Ordered list
1. Web science

2. Artificial Intelligence
3. Computer architecture

Web science is an *emerging interdisciplinary* field concerned with the study of large-scale **socio-technical systems**, particularly the World Wide Web. It considers the ***relationship between people and technology***, the ways that `society and technology co-constitute one another` and the impact of this co-constitution on broader society.
5   Latex and Overleaf

1. Solution for Typesetting Exercise 1
   In March 2006, Congress raised that ceiling an additional $0.79 trillion to $8.97 trillion, which is approximately 68% of GDP. As of October 4, 2008, the "Emergency Economic Stabilization Act of 2008" raised the current debt ceiling to $11.3 trillion.
